There is a very good documentation about the low level programming of the DOC and the sound RAM in the IIgs Epluché book :

www.apple-iigs.info/doc/fichiers/iigsepluche1.pdf

Starting from Page 413 to 464. You will find there the core routines to initialize the DOC, to write/read sound data data to/from the DOC memory, to play sounds...

Even if it is in french, you will find there a lots of small source code samples (Assemby Language, Merlin 16+ style).

No doubt that such part should be translated in english.

Oz
