I'm trying to use the program now and I have a quick note that is VERY important.

I kept getting syntax errors when using the commands because it expects the parameters to be hex (as stated in the doc), but even though commands are case-insensitive, the hex parameters MUST BE IN UPPER CASE!!!!

E.g. -

```
org $002000,$bc8000  
^^ Doesn't work
```

```
org $002000,$BC8000  
^^ Correct!
```

E.g. -

```
hex $BC8000,5e2  
^^ Doesn't work
```

```
hex $BC8000,5E2  
^^ Correct!
```
