Hey folks, there's a handful of users here now, and I've gotten lots of super constructive feedback both here and via email/Facebook. I've tried to keep up with it all, but it's time to extend my trust to the community.

If anyone would like to help out, and be a moderator for these forums, I'd greatly appreciate it. For right now that mostly means approving accounts. But you'd also be able to manage the creation of new categories and forums. You could also help with silly little things like making Apple II specific "smileys" for posts if you want. This forum runs using FudForum software, which I've never used before, but it seems fairly straightforward.

Just send me a Private Message and I'll make you a mod.
