When I attempt to attach a photo to a post using the "File Attachements" I get the following error:

File Attachment is too big (over allowed limit of 10485760 bytes)

I tried with both JPG and PNG images. One of the images was around 100KB and the other was around 50KB.

What is the preferred method to add images to posts? I try to avoid adding links to photos when ever possible because I have a tendency to move or rename files and create dead links.
